*** This column is for your information, please take note, don't ever say "Oh, I didn't know!"

NEW COLUMN

Due to the greater need, this year, on the quality of our music and songs, we have introduced a new column entitled "Musical Notes" which will feature a variety of hints and information about our songs. Included will be various songs with their chords, their origin, meaning of different types of songs or interviews with the director, lead singers or someone who has something to say pertaining to our music.

****Look for this column in our next edition!**

Hear and Now FolkSINGING Group

As members of this group the primary and most important job of each one of us, is SINGING: learning our parts, pronouncing our words, projecting our voices, memorizing the songs and presenting them to the audience. Therefore, jobs associated with the executive, ^{and} various committees, are secondary.

With too much emphasis on organization we lose sight of the reason for which our group was formed.

We may be a great organization, but if there is no singing, then there will be no performances, and if there are no performances there is no need to organize, and we end up as nothing!

" Ray "

Ray , the WOP , was born on September 10 , 1949. He Comes from a family of Italian , Scottish and Irish background which accounts for his most profound name , which he would rather forget. Ray has always been a Longueuil - Ville Jacques Cartier resident.

This easy-going Bass spent 2 years of elementary schooling at a French school , and then moved to an English one , right across the street. During those years Ray remembers the day that the furnace in his house almost blew up , and being a goalie on his school hockey team.

His high school years were spent in the South Shore Catholic High School and he graduated from there in grade 11. During these years and especially grade 11 , Ray was noted for his missing classes , and could usually be found having afternoon parties when he was supposed to be in Geometry or Chemistry class. Those are the parties which we are remembering Ray for now.....

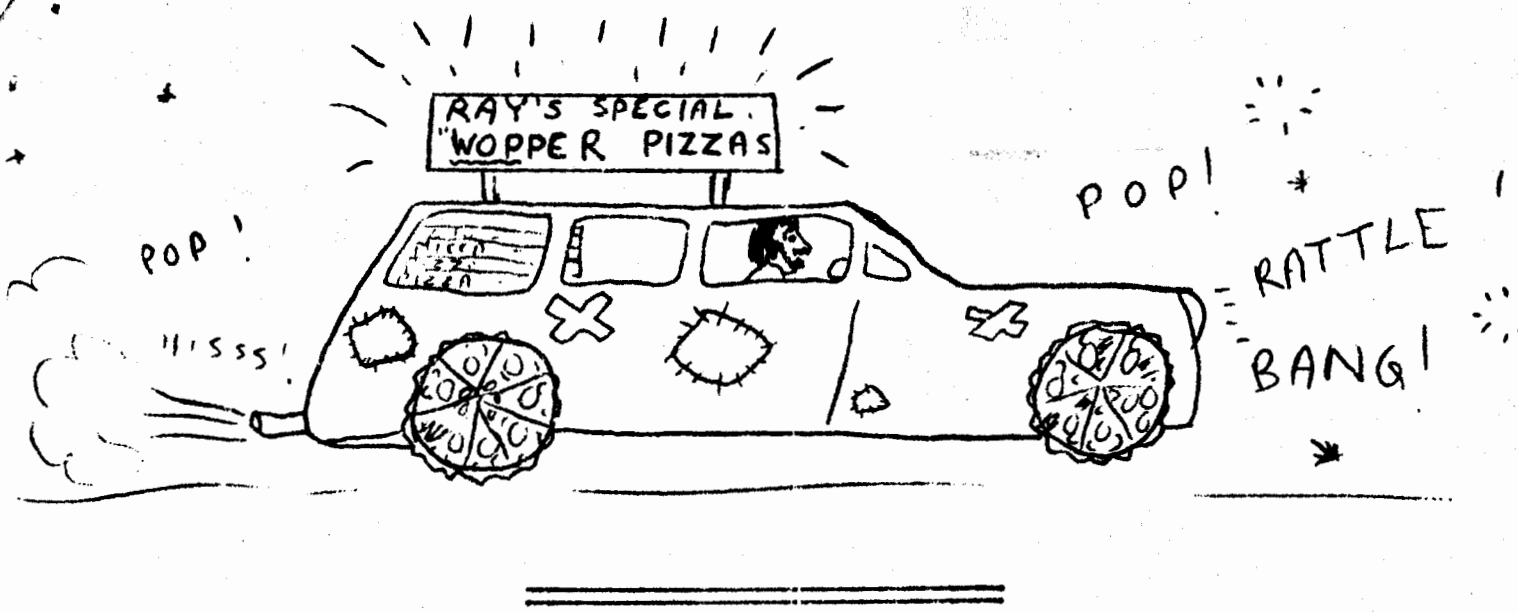

Ray has always had a love of animals and at one time was working part time in a Pet Shop. He and his kind heart decided to help the Pet Shop by raising white mice in his spare time . Well , one night one of his 20 mice was missing and no one could find it anywhere in the house. That night , while everyone was sound asleep the mouse was found; in Mrs. Aloï's BED. He was told that he had to get rid of the mice , so he did . He traded them in for a 26" lizard. Well , one night he came home and found the lizard missing , but there is one problem. The poor thing is still missing in the Aloï household to this day. Please Beware.....

Ray first met the "Hear and Now" through his long time girlfriend Debbie Purdie . At first he didn't want to join , so he helped out by driving people and equipment in his station wagon , which he hopes to have on the road in a matter of days. He was then talked into joining^{and} has been here ever since. Ray's favorite songs are Beautiful Sunday (as done in the Lions Club Parade) , and Soolaimon , but he likes them all . He really enjoys our weekends away. Ray also feels that the group could think a little more about doing shows to benefit such groups as the blind , the Elderly , Orphanages and the Handicapped . He would like to see more of an effort made to stop petty bickering and complaining and emphasis placed upon really getting along with each other. Besides being in the Hear and Now , he is on the Executive , filling the position of Personnel Liason between the Executive and the Group. He also is a Cub Master , Venturer Advisor , in a Bible Study Group, and loves camping and the outdoors.

Ray is presently employed at United Aircraft of Canada in Production Control. He is currently involved in a program which will eventually introduce Computers to his department. His future ambitions are to work in the field of Public Relations or Personnel , and to become a farmer and own a house in the country.

If anyone wants to find Ray , here is what you do: SING THIS to a deer , a female deer , RAY what's the matter for you

We want to wish Ray the best of luck in the future and hope that he continues to add a spicy Italian flavour to our group!
